

**CC-CHOC –
Pediatric T2 Research
Workgroup
August 6, 2009**

Change in Leadership

- Debbie Gipson (UNC) stepped down as Chair
- New Co-Chairs:
 - Alex Kemper (Duke)
 - Eneida Mendonca (Univ. of Chicago)
- Teleconferences will alternate the 4th Wed / 4th Thurs (starting with Wed in August) to allow greater group participation

Plan for the Upcoming Year

- Have members of our workgroup participate in those CTSA groups that are preparing white papers/reports related to T2 research to:
 - Assure that issues related to child health care are addressed
 - Provide a mechanism to share the work of these other groups with the pediatric research community
- Advantage: Feasible process for our workgroup to have an impact
- Disadvantage: No stand-alone product from our workgroup (to me – very minor disadvantage)

Potential Groups for Partnership: Strategic Goal Committees

- 4A Community Engaged Research Workgroup
- 4B Comparative Effectiveness Workgroup

Potential Groups for Partnership: Key Function Committees

- Community Engagement Key Function Committee
 - Community-based Academic and Practice Partnership
 - Educational Competencies Taskforce
- Clinical Research Ethics Key Function Committee
 - Educational Materials Group
- Informatics Key Function Committee
 - Use Needs Group
- Translational Key Function Committee

Questions / Advice

- Prioritization of partner groups
- Suggestions for incentives for workgroup members
- Metrics for success
